Captis Intelligence is a global industry leader in security and crime prevention.

Captis has over 50 years of combined experience in intelligence, API, security and over 100 combined years in technology and modern applications serving some of the world's largest Enterprises.

PRE-INCIDENT INTELLIGENCE

Help your organization better prepare for today's threats. Learn how Captis combines operational threat intelligence with open-source data to deliver pre-incident intelligence on a local or global scale.

POST-INCIDENT INTELLIGENCE

Your organization has just experienced an incident, crime, or unrest and you need to immediately identify subjects from surveillance video or still images and rapidly gather valuable intelligence to conclude your investigations. Captis provides businesses with intelligence from over 75 million public criminal files, the dark web, and the deep web.

'We believe modern times require modern Intelligence platforms for Security and Asset Protection Professionals to be successful'

PRE-INCIDENT INTELLIGENCE

ASI

Automatic Subject Intelligence provides the tools your team needs to stop crimes before they happen. Leveraging your existing surveillance infrastructure ASIConnect can provide your team with immediate feedback on potential persons-of-interest entering your facility. Any number of POIs are scanned across the world's largest private database of 75 million public criminal files.

PRISM

Protective Research and Investigation in Social Media is an intelligence platform that combs the web to identify potential threats to your people and locations. Leverage PRISM to elevate your pre-incident investigations with targeted intelligence gathering on subjects, their network, and communications.

CRIME INCIDENT LOG

Captis understands that timely access to localized crime intelligence is an essential component in obtaining effective situational awareness. Whether your business is a single location or thousands of locations, consistently updated crime information is integral to determining risk and learning of crime trends that may affect you or your operation.

POST-INCIDENT INTELLIGENCE

PRISM

Protective Research and Investigation in Social Media is an intelligence platform that combs the web gathering critical investigative information. Leverage PRISM to elevate your post-incident investigations with targeted intelligence gathering on subjects, their network, and communications. Use it to also help with Organized Retail Crime intelligence.

ODSI

Captis' On-Demand Subject Intelligence allows rapid identification intelligence on subjects from surveillance and still-images. Utilizing the Captis Database of over 75 million criminals, ODSI delivers a leading solution to bridge the gap between surveillance and identification.

SOLVEACRIME.COM

Leverage the power of the Captis Criminal Act Social Network. Post crimes and use the exclusive network to deliver incidents to a highly engaged and active audience within a targeted geography surrounding the crime location. Get tips immediately and implement a powerful local deterrent to reduce future criminal activity.

FEATURES & BENEFITS

- Over 75 million public criminal files with high-resolution images and dossiers
- Receives more than 200K updates per week from over 25K government sources
- The largest terrorist database in the world from 60 countries
- Criminal data intelligence from over 150 countries
- Millions of crime data incidents with historical data
- Over 2M sanctioned list dossiers
- 300K missing persons and hostage (child & adult) records

- Powerful post-incident identification solution
- Upload or "Drag & Drop" any facial still-image from your surveillance system where results appear within seconds based on percentage match
- ODSI immediately detects the faces in your image and provides information such as gender, age range, facial hair, and expressed emotions captured in the image
- Add your own persons-of-interest images only accessible by your enterprise
- 30,000 locations using ODSI

- A worldwide Captis crime solving community with over 20M registered users
- Powerful deterrent - view rates of 100,000 people within 48hrs
- Highly effective identification and location tool
- Mass broadcast across multiple conduits
- Anonymous tips are sent in real-time to the user
- Visibility of social media analytics and incident details
- 70% reduction in future criminal incidents at same location

- Instantly face-match subjects in real-time across the exclusive Captis database of over 75M public criminal files
- Users receive immediate notification upon high-percentage match or specific person-of-interest
- A non-intrusive and privacy supported system with a high priority on equal performance across all ethnicities and genders
- Captis does not store any biometric data of the general public

- Auto-monitors the surface web, social media, and deep/dark web sources for specific threats against your business
- Provides businesses with the tools to notify authorities on a subject's location
- Quickly investigate individuals, their online networks, and communications
- Custom queries run 24/7 with no hardware investment or staff training cost

- Immediately identify crime trends based on a selected radius
- Gain valuable situational awareness with Captis crime feeds updated every 24hrs
- Access millions of crime data incidents with up to 10 years of historical data
- A visual interactive crime map based on a selected location
- Millions of crime incidents with historical data from over 25,000 government data sources

OUR MISSION

We believe modern times require modern **INTELLIGENCE PLATFORMS** for Security and Asset Protection Professionals to be **SUCCESSFUL**. We believe combining **MODERN TECHNOLOGY**, big data, IOT devices and today's **SOCIAL TOOLS** in an integrated platform can **DELIVER** pre- and post-incident **INTELLIGENCE** faster and more reliably. We believe Security and Asset Protection teams can **DO MORE** with fewer resources and **LESS TIME** by utilizing the **CAPTIS INTELLIGENCE I-4** Solutions to gain the Intelligence they need in any situation.

DANIEL SANTELL / CEO
DARIO BREBRIC / PRESIDENT

“We’re now closing over 50 percent of our violent crimes within a week. It has become one of the most interesting and quick successes that I have ever had with a new solution—and I’ve been in AP for forty years.”

ROBERT OBEROSLER
FORMER VICE PRESIDENT OF ASSET PROTECTION / RITE AID

“It has definitely impacted us in many ways, been very effective, very easy to adopt and easy to use. It has met all of our expectations, including our ability to use all the functionalities of it and to use it in different parts of our business, safety, social media awareness, situational awareness.”

QUENTIN GOWARD
SENIOR MANAGER FOR BUSINESS SECURITY & ORGANIZED RETAIL CRIME / KROGER

“Traditional media has been an ally of retail loss prevention, historically our only source to public mass-release of surveillance video in hopes of suspect identification. Captis has provided a much more reliable, consistent, and targeted capability that has shown far better identification and deterrent results.

CAPTIS CUSTOMER

“Professor of Security Studies at Nanyang Technological University (NTU) in Singapore and Founder of the International Centre for Political Violence and Terrorism Research”

ROHAN GUNARATNA / MEMBER OF ADVISORY BOARD

“Suspect identification issues are relevant in all facets of crime, safety, and security. Current technology offers a variety of reactive solutions that do not address the needs of the law enforcement and asset protection community. Now, like never before, we can identify, locate, investigate, and apprehend suspects with Captis Intelligence’s game-changing system.”

CHARLES ARCHER
FORMER ASSISTANT FBI DIRECTOR / CHAIRMAN OF LAW ENFORCEMENT COUNCIL

“Identifying subjects instantly with ODSI has been one of the most significant advancements that I have seen in investigations. It also allows us to utilize the technology without breaching privacy since it’s entirely post-incident.”
