

AUTOMATIC SUBJECT INTELLIGENCE

Automatic Subject Intelligence with high precision face-matching connected to the largest private database of criminals in North America directly from VMS.

Real-time face detection allows for automatic submission to Captis

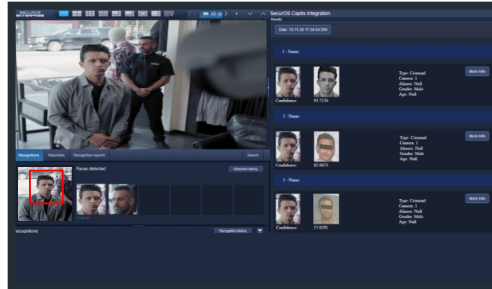

Image is scanned across the exclusive Captis Database of 75 million public criminal files

Results appear within seconds providing intelligence when you need it

Features & Benefits

Challenging Surveillance Footage

Our deep learning face-matching system does not need pixel-perfect images to provide great results. ASI's image analysis applies post-processing tools to elevate accuracy in the most challenging environments.

High Successful Track Record

With over 30,000 locations using our solutions in North America, Captis have significantly elevated the Security and Asset Protection practices of multiple Fortune 500 companies.

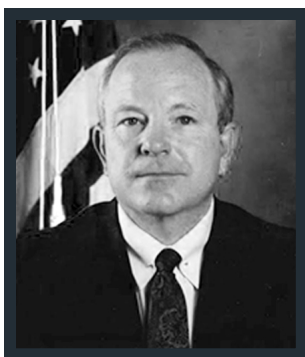

Facial Detection and Analysis

ASI immediately detects the faces in your image or surveillance feed and scans them across the exclusive Captis Database for potential matches, results are delivered within seconds. No additional hardware or software are required.

Access to the exclusive Captis Database Of over 75 Million criminals

The exclusive Captis Database contains full dossiers of high-risk individuals including terrorists, wanted suspects, sex offender, and high-risk felons. Over 200,000 updates per week from over 20,000 government sources. The Captis Database is comprised solely of public criminal records made available for public consumption and adheres to all privacy and data compliance laws.

CHARLES ARCHER

FORMER ASSISTANT FBI DIRECTOR
CAPTIS INTELLIGENCE / CHAIRMAN OF LAW ENFORCEMENT COUNCIL

"Subject identification issues are relevant in all facets of crime, safety, and security. Current technology offers a variety of reactive solutions that do not address the needs of the law enforcement and asset protection community. Now, like never before, we can identify, locate, investigate, and apprehend suspects with Captis Intelligence's game-changing system."

ROHAN GUNARATNA

LEADING AUTHORITY ON WORLD WIDE TERRORISM
CAPTIS INTELLIGENCE / MEMBER OF ADVISORY BOARD

"Captis Intelligence understands the importance of exclusive terrorist data being utilized by not only nations and states, but within private industries, where valuable intelligence can prevent fatal events."
